Mammoth Way Hot Topic – Be Professional

As team members, you are almost always more experienced than many of our guests. Use Field Guide and the Mammoth Mountain website to learn more solutions and opportunities to share experiences for all our guests.

Answer the following to enter the Rap Sheet drawing. Send an answer, via e-mail, to host@mammothresorts.com, stating the last day to get a Quad pack + a lift ticket. Use [Quad pack + lift ticket | Mammoth Mountain](#) to find the answer. Enter for a chance to win \$10 Mammoth Bucks. Judy Smith is this week's winner!

Safety Corner – Hot Topics for Host Safety

Safe Lifting

1. Size up the load: Make sure the load is stable, balanced and light enough for you to safely lift. If it is not, get help or use a dolly or some other lift aid.
2. Plan the job: Find a route that is free of slip and trip hazards. Figure out where you will drop the load off, and plan rest stops along the way if necessary.
3. Establish a base of support: Keep your feet at least shoulder-width apart. A staggered stance, with one foot slightly behind the other, can help form a strong base of support.
4. Bend your knees: Bend at your knees, not at your waist
5. Get a grip: Grip the load firmly, using your whole hand, not just your fingers.
6. Lift with your legs, not your back: Flex your knees and hips, not your back, and avoid bending at the waist.
7. Keep the load close: The closer the load is to your body, the less force it puts on your back. Carrying 10 pounds at arm's length feels like lifting 100 pounds.
8. Pivot; don't twist: If you need to change direction, move your feet, taking small steps
